PROFESSIONAL SUMMARY

Cybersecurity-focused B.Tech Computer Science & Engineering student with hands-on training across VAPT, network security, system & server security, cloud security, mobile application security, digital forensics, malware analysis, and threat hunting. Experienced with Python/Flask security applications, Linux/Kali Linux, security tooling, and troubleshooting.

TECHNICAL SKILLS

Cybersecurity: VAPT, Network Security, System & Server Security, Cloud Security, Mobile Application Security, Malware Analysis, Reverse Engineering, Threat Hunting, Digital Forensics

Security Tools: IDA, Procmon, JADX, MobSF, Nmap, Wireshark, Burp Suite, Metasploit, Splunk, Autopsy, FTK Imager, Kali Linux

Systems & Cloud: Linux/Kali Linux, Windows Administration, System Administration, IT Support & Troubleshooting, Networking, VMware, VirtualBox, AWS (VPC, EC2, S3, Load Balancer, IAM)

Development: Python, Java, C/C++, Flask, HTML/CSS, SQL/SQLite, Git/GitHub, Docker; JavaScript and OOP (basic/working)

AI / GenAI: Ollama, LLMs, Generative AI, AI Application Development, Prompt Engineering, Google Gemini API

DSA: Strong foundational level; currently focused on arrays using Java and C/C++

PROJECTS

SecureStack — Web-Based Cybersecurity Toolkit

Full-Stack Developer & Cybersecurity Contributor | Team of 4

- Built a Python/Flask and SQLite web application presenting cybersecurity workflows through beginner-friendly interfaces.
- Contributed across backend, frontend, database, and cybersecurity functionality.
- V1 includes three major tools: Google Dorking, Image Analyzer, and WHOIS; V2 is actively under development.

Tech: Python, Flask, SQLite, HTML, CSS, JavaScript, Linux, Git/GitHub

BrainSparkz — AI-Powered Learning Platform

Backend-Focused Full-Stack Developer | Team of 6

- Developed backend functionality for a gamified learning platform for Classes 6–10.
- Worked on backend logic, database structure, AI integration, and overall application flow.
- Selected as a Smart India Hackathon 2025 Semi-Finalist.

Tech: Python, Flask, SQLite, Google Gemini API, HTML, CSS, JavaScript, Figma

Local LLM Lab — AI/LLM Experimentation

- Experimented with locally hosted LLM workflows, prompting, model behavior, and local AI environments using Ollama and Docker.

Tech: Ollama, Docker, LLMs, Prompt Engineering

EXPERIENCE

Digital Marketing Intern — Sec Tech Creation

Dec 2025 – Mar 2026

- Worked as the sole marketing member, supporting digital content and social media activity.
- Drove 100,206 YouTube views in 4 weeks, with a ~60K peak Short, 107% subscriber growth, and 260% watch-time increase.

EDUCATION

B.Tech. Computer Science & Engineering — PIET, Parul University

2023–2027 (Expected) | CGPA: 8.01/10

Class XII (RBSE) — Adarsh Vidya Mandir Senior Secondary School, Majiwala

2022 | 69.80%

Class X (RBSE) — Adarsh Vidya Mandir Senior Secondary School, Majiwala

2020 | 74.83%

CERTIFICATIONS

Quick Heal Academy Certified

- Cyber Security Analyst
- Network Security Analyst
- System and Server Security Analyst
- Managing Cloud Infrastructure and Security Analyst
- Vulnerability Assessment and Penetration Testing Analyst
- Digital Forensics Investigator
- Mobile Application Penetration Testing Analyst
- Malware Essentials
- Threat Hunter

ACHIEVEMENTS

- Smart India Hackathon 2025 — Semi-Finalist (BrainSparkz)
- Cognizant Technoverse Hackathon 2026 — Participant
- [TryHackMe](#) — Top 35%
- Volunteer at Cyber Carnival 2025 – L&T Vadodara

SOFT SKILLS

Communication · Problem Solving · Analytical Thinking · Adaptability · Learning Ability · Ownership / Responsibility · Teamwork
